OrangeHRM – Test Plan

1. Project Information

Application Name: OrangeHRM

Application Type: Web-based HR Management System

Application URL: https://opensource-demo.orangehrmlive.com/

Testing Type: Manual Testing

Testing Approach: Functional Testing

Test Level: System Testing

Test Execution: Manual

2. Objective

The objective is to verify that OrangeHRM functionalities work according to the requirements and that users can perform HR-related operations correctly.

The testing will focus on functionality, field validations, error messages, navigation, data handling and user permissions.

3. Scope of Testing

The following modules are included:

- 1. Login
- 2. Dashboard
- 3. Admin
- 4. PIM (Employee Management)

4. Functional Requirements

4.1 Login Module

- Users should be able to log in using valid credentials.
- Invalid credentials should not allow users to log in.
- Mandatory fields should be validated.
- Password should be masked.
- Users should be able to log out.
- Users should not access protected pages without authentication.

4.2 Dashboard Module

- Dashboard should be displayed after successful login.
- Dashboard widgets should be displayed correctly.
- Quick launch options should work.
- Dashboard information should be displayed correctly.

4.3 Admin Module

- Admin should be able to create user accounts.
- Admin should be able to search users.
- Admin should be able to edit user details.

- Admin should be able to delete users.
- User roles and statuses should be managed correctly.

4.4 PIM Module

- Users should be able to add employee details.
- Users should be able to search employees.
- Users should be able to view employee information.
- Users should be able to edit employee details.
- Users should be able to delete employees.
- Mandatory employee fields should be validated.

5. Testing Types

The following testing types will be performed where applicable:

- Functional Testing
- Positive Testing
- Negative Testing
- Smoke Testing
- Sanity Testing
- Regression Testing
- Retesting
- UI Testing
- Boundary Value Analysis
- Equivalence Partitioning

6. Test Environment

- Application: OrangeHRM Demo
- Browser: Google Chrome
- Operating System: Windows
- Testing Type: Manual
- Test Data: Valid and invalid test data

7. Test Deliverables

The following documents will be prepared:

- 1. Test Plan
- 2. Test Scenarios
- 3. Test Cases
- 4. Test Data
- 5. Test Execution Report
- 6. Defect/Bug Reports
- 7. RTM (Requirement Traceability Matrix)
- 8. Test Summary Report

8. Entry Criteria

- Application should be accessible.
- Test environment should be available.
- Requirements should be understood.
- Valid test credentials should be available.

9. Exit Criteria

- Planned test cases should be executed.
- Critical defects should be reported and addressed.
- Failed test cases should be documented.
- Test execution results should be recorded.
- Test summary should be prepared.

10. Assumptions and Limitations

- Testing will be performed on the publicly available OrangeHRM demo application.
- Only functionalities accessible through the provided demo account will be tested.
- Some features may be unavailable because of account permissions or demo restrictions.
- Testing will be limited to manual functional testing.
